

This week pupils have also been developing their skills in FT and to celebrate the hot weather have been making their own pasta from scratch using individualised machines. The pupils all engaged brilliantly and created a range of pasta which include tagliatelle and ravioli. Pupils had to make this directly from the raw ingredient, roll it, stretch to the right size before putting it through the machines with different nozzles to get the type they wanted. Pupils really enjoyed the task and made some excellent pasta dishes.

Pupils have also been producing clay models of their choice during Art lessons this. These are being made and designed, and made this week ready for painting next week. The pupils also enjoyed drawing within their natural environment outside this week and took advantage of the stillness. Pupils used tools and boards to make their creation.

There has also been opportunities for pupils to work outside safely remaining within their bubbles. This has included both taking their normal class work outside, doing Art and enjoying the landscape and continuing the work on improving the school garden.

Overall it has been a very productive week at Pinetree and the pupils continue to make good progress towards their work and even with some difficult temperatures and working conditions did very well.
